

DEKOUVER NOU LOSEAN

Game Pack

HELP THE DUGONG!

This **dugong** (*Dugong dugon*) is hungry!
Help us take him to **Aldabra** to find a
seagrass patch for him to **forage**!

GUIDE THE HATCHLING

This **green turtle** (*Chelonia mydas*) hatchling is ready to take on the world. Help her find her way safely into the open **ocean**

MATCH THE SHARKS

FISH ID: _____

FISH ID: _____

FISH ID: _____

Oh no! Our files were corrupted and the **research team** cannot **ID these sharks!**

Can you **unscramble** them and **identify** these species?

MATCH THE CHICKS TO THE MUM

After a day out fishing at sea, these mummy birds need to **find a way back to their chicks**. Can you match them correctly?

SOMETHING LOOKS ODD...

Something isn't right here... can you **identify which species** don't belong in the **fish group**?

RED-FOOTED BOOBY

Sula sula

#DidYouKnow Aldabra has the largest documented population of **red-footed boobies** in the Indian Ocean?

SOLUTIONS:

Help the Dugong

Match the sharks

FISH ID: Bull shark

FISH ID: Black-tip reef shark

FISH ID: Sicklefin lemon shark

Guide the hatchling

Match the chicks

Photo 1: Frigatebird

Photo 2: Red-footed booby

Photo 3: Red-tailed tropicbird

SOLUTIONS:

Something's wrong!

Dugongs, dolphins, humpback whales are all **marine mammals**, meaning, like us humans, they **have lungs** and must rise to the surface and **breathe air!**

Turtles, like the **green turtle and hawksbill turtle** are **reptiles** - they also **breathe air** and **they lay their eggs on land** rather than in the water.

Sharks, rays, marlins are all **fish** - this is because they **have gills** to breathe.
